## **What is the ArchAngelo**

The ArchAngelo Essences have appeared at this point in time for specific purposes. The ArchAngelo are part of the spiritual hierarchy, specifically representing the Spirits of Fire.

The name ArchAngelo comes from the biblical Greek and Hebrew sources. ArchAngelo are often synonymous and known as the Archangel in Christian esotericism. They are thought of as messengers of God. They are considered to be the beings which support the folk-spirit of to country similar to landscape angels.

The ArchAngelo are from the higher dimensions of being, the archetypal world, that helps us to link with others who may be associated with our individual mission and purpose.

The hierarchy of ArchAngelo work with the individual human being particularly during points of change or transition such as the time between death and a consequent new birth. During that in-between time, seeds of potential for circumstance or events based on memory of, or in, prior life experience are planted as to the intended nature of the soul's expression of Self in the present life.

The ArchAngelo Essences may help to stimulate memory of the seeds, the potentials, previously imprinted to enhance recall of what was intended.

They have been released at this time at the request of the hierarchy to stimulate seeds that were planted long ago in relation to the unfolding of the higher plan that is unfolding upon the earth. Those accessing the ArchAngelo Essences participate in an activation via their Etheric body towards this unfolding.

The ArchAngelo are the guardians of all people and all living things, coming in time of crisis, when there is a need to protect and guide. They may bring joy, happiness and inspire the conscious development of what could be an earthy paradise, both personally and globally. The mission of the ArchAngelo could be seen through their intention to encourage the development of positive change.

The ArchAngelo Essences offer a real inspiration from spirit at this time. They are of the appropriate intensity and vibration to suit the personal auric field.

As the ArchAngeloi fundamentally work with the collective, helping for example the development of families, groups, cities and countries, they help the individual to become more conscious of his/her relationship with the collective.

In a sense, they help with the key process in the Aura-Soma Colour System, the process of individuation, with the awakening of the Turquoise area, the Ananda Khanda and the movement of this small centre from the right side of the chest a little towards the middle of the body.

The Essences are intended to bring about a more personal connection with the ArchAngeloi through the subtle fields related to our physicality. After using the ArchAngeloi, people may experience a tingling at a physical level as new energies are introduced into the subtle fields.

A sense of well-being may ensue as these energies are remembered within the physicality.
